ADELL: WATER EXPERIENCE FOR YOUR LIFESTYLE.

Established in 1981 we are proud to have ADELL, a leader company that manufactures its own mixers / taps. ADELL is the outstanding example of an independent and fully integrated Turkey-based manufacturer, performing the complete production cycle with technology and management solutions ahead of its time.

With our 38 years' experience, we are happy to announce our new company future vision: ADELL – Water experience for your lifestyle.

We recognize that everyone's taste and individual requirements vary when re-fitting or adjusting your bathroom. And our main experience is water. So we combine this philosophy. It's confusing market with many brands offering cheaper inferior products of a lesser quality. That's where we aim to assist. Browse through pages of inspiration to find exactly what you're looking for and for further information and pricing.

Great designs have created a truly global language, ADELL is aiming to be a forefront company that makes use of water in way that people would like.

We use the latest technology to manufacture our own mixers and we are proud of this. Our design philosophy is 'Designed in Istanbul & Made in Turkey'. All design and crucial stages of product conception, development and manufacturing are performed within our facilities in Istanbul, one of the most fascinating city of the world.

ADELL is now one of the well-known brands in the industry and is very sensitive to the efficient use of resources, water and energy, and continuous development of innovative solutions in design, materials, function and performance. We take care of our water culture history, and show our respect with ADELL AB-I HAYAT water culture museum inside our facility.

We are perfectly equipped to provide water experiences that exceed all expectations – both today and tomorrow. We are passionate and are proud to be at the heart of changing global landscape.

Yours Sincerely,

Recep Ali Topçu  
Adell Faucet & Valve Manufacturing Co. Inc.  
Chairman

# A WILLING SOCIAL RESPONSIBILITY PROJECT

# âb-ı hayat

## MUSEUM OF WATER CIVILIZATIONS

Adell Ab-ı Hayat / Collection of Water Civilization.

Water is the life, the elixir of life. Water, having the power of purification and cleaning, is the symbol of purity, simplicity and wisdom in all civilizations. Ab-ı Hayat (Adam's Ale), the water of immortality, means sweet and fresh water whose drops give an endless life. Fountains, hamams (Turkish public baths), 'şadırvan' (a fountain used for ritual ablutions), cisterns, water canals and aqueducts have risen as the artifacts of this civilization throughout history. That's why we named our collection of water civilization as "Ab-ı Hayat (Adam's Ale)" as an expression of tribute and respect to water.

Adell Armatur collects historical artifacts related to our water civilization as a sustainable social responsibility project in order to improve public awareness about water, introduce the water civilization and hamam culture from past to present, bring the values sinking into oblivion to light. It also organizes trainings and seminars, and holds exhibitions on water saving and water management. Our Ab-ı Hayat (Adam's Ale) Collection of Water Civilization aims to present the phases of our water civilization with its deep rooted history.

Some parts of the Adell Armatur collection were exhibited at the World Water Forum, in 2009. The exhibition "Past to Present Water and Water Culture in Istanbul" was held within the İstanbul 2010, European Capital of Culture events. The exhibition "From the Source to the Demijohn" was held at the 3rd İstanbul International Water Forum in 2011; "Bathing in the Ottoman tradition – Hamam" was held at Tuyap Unicera Fair in 2011; "Living with water" was held at the Tuyap Unicera Fair in 2012; and lastly "The Friends of Water" was held at the Tuyap Construction Fair in 2012. Adell Mixer took part in the organization committee of the International Conference on "Water in ancient civilizations" and presented 3 declarations at the conference.

Adell Armatur collection of water civilization is exhibited at a permanent exhibition hall of the head office in İkitelli Organized Industrial Zone and is open to visits. You can discover details of Ab-i Hayat Water Collection activities our web site.

# FROM IDEAS TO SIMPLY BEAUTIFUL DESIGNS.

There is an idea behind every successful product. Everything is a dream come true. We work for original designs that speak the same language as the venue. The designs are carefully investigated and planned with careful details. The designs that increase the energies to the skies and take care of every drop of water ...

# GLOBAL SALES NETWORK.

38 years experience, almost 41 different countries.

As diverse as peoples requirements and tastes may be, the basic need of people on this planet are the same, also the concerns. In throughout the world ADELL's employees take personal care of request from our customers and partners.

We know by heart: we stand for the water experience that people would love.

# DESIGN, PRODUCTION AND TECHNOLOGY AT ADELL.

Production potential based on the advanced production technology, team of experts committed to work with passion and years of experience are behind high qualified Adell products.

## DESIGN AND INNOVATION

Innovation and design are our most important values. Adell has unique aesthetical and stylish designs which protect the water and environment. We believe a good design will catch everyone. Our products are designed by our design experts according to customer demands and expectations, considering the national and international standards and our design criteria. Functionality, energy saving, aesthetics, ergonomics, mountability and maintainability, size compatibility, safety, production life span, testability, modularity, packaging and shipping, impact on environmental pollution, waste utilization, production techniques and cost issues are taken into consideration at the design phase.

Adell has brought numerous innovations in the industry with its innovative approach.

## MOULD PRODUCTION

Mould is the base and the start-up phase of our work. High quality can only be produced with well-designed and professionally taken moulds. Mould developing is processed using the most precision CNC workbenches. Core, casting and hot working moulds, designed using the 3D Unigraphics CAD-Programs in computer environment, are made by cutting the steel blocks in microns with high precision.

High temperature resisting steel blocks and copper-beryllium metallic materials are used in moulds. The steel molded becomes ready for draft casting with heat treatment.

## ROUGHCAST

Drafts are produced in different ways: low pressure die casting, Gravity die casting and hot forging/press. Sand mixtures, obtained by mixing the green sand with resin, silica sand and appropriate catalyst and chemicals in sand preparation machines, are formed into cores in the automatic coremaking machines. Water grooves in the mixers are created in this way. Draft is produced by casting high qualified ingot brasses, melted in the electric induction furnaces with high temperature, into the moulds placed in the casting machines as cores. Runners are cut by removing the core sands; so the mixer body drafts can be obtained using the casting method. High qualified brass rod raw material is cut in determined measures at the process plans, is annealed in appropriate heat and finally formed into drafts with hot working/ forging method using high tonnage presses.

## SURFACE TREATMENTS

Product surfaces are the elements on which we lay too much stress as they are a kind of last clothing of our products. Coating protects the surfaces from corrosion and mechanical effects, gives the surfaces an aesthetical appearance and enables them to harmonize with other accessories in kitchen compartments.

## MECHANIC OPERATIONS

Drafts, whose runners are cut and whose burrs are taken off, are processed on CNC controlled benches, in the automatic transfer machines which carry out all operations named as mechanic operations such as turning, drilling, thread cutting and screw cutting. In this section, various internal parts of the mixers such as packing, couplings, nipples, shafts are also produced from the high qualified brass rods, using multi spindle turning devices on CNC automatic machines. A strict quality control procedure is applied at all phases of production performed within ISO 9001 Quality Management Systems and during montage.

## LABORATORY

Laboratory R&D activities are the studies which will carry us into future. The basic approach of our R&D unit is to spread on effort to ease the life and make life standards safer and more comfortable for people. Adell's laboratory centre has the modern laboratory systems required by the related standards.

## ASSEMBLING, TESTING, PACKAGING

Product quality is developed with the perfect combination of fine components, details and precision workmanship. Each part is picked and scaled carefully with this approach. The product is mounted by assembling the product body with the parts such as cartridge, lever, aerator and screw. The assembled products are subject to 100% leak-tightness, Functionality, and resistance to pressure tests in high precision testing devices. In addition, they are tested in life span, flow rate, sound and surface coating strength through the random method.

## LOGISTICS

Our products meet our customers, vendors and users through our effectively managed logistics process. Requests are delivered to our customers properly, timely, expeditiously, faultlessly and carefully by means of modern warehouse management systems and programs. The packaged products are taken to the storage area in order to be shipped to the customers in accordance with the shipment programs.

# PERFECT COMBINATION OF DIFFERENT MATERIALS FOR SUSTAINABLE QUALITY.

From which parts does a mixer consist? Excellent details, durable components, compatible hardware result in Adell quality. High standard, long life combined Adell mixers superior performance and long term performance thanks to the compatibility of all components and spare parts and durability. Carefully engineered, all parts complying with the standards.

## ERGONOMIC Handles

Adell handles are produced of high quality zinc material. It provides ease of use with ergonomic forms that grip the hand.

## 100% BRASS Mixer spouts

From quality raw material produced long-lasting chic of the sink. Ergonomic and easy to use in forms and in different sizes for your to use the water comfortably.

## PLUMBER FRIENDLY Fixing deck-mounted parts

Adell mixer connections made from stainless and brass raw material. It provides to easy installation, easy replacement and easy maintenance.

## EASY-OPERATED Bath mixer diverters

Automatic and compact Neoperl diverters are used. Long life and performance guarantee. When pulled up and locked to the right, it locks, when the battery is switched off, the pressure automatically switches to the crown position. Due to the locking system of the shower control unit in the bath and shower baths, the water flow from the handgrip is not affected by pressure fluctuations.

## %100 BRASS MADE-IN-HOUSE Wall connection parts

Wall-connection eccentrics and raccors are produced from the first quality brass raw material. The wall connection elbows are 10-15 mm longer than the market products, so the threads do not need to be extended.

## WATER SAVING Aerators

Aerators are critical parts that determine the overall performance of a mixers. In the aerators, the water flow is enriched with plenty of air. This ensures that the water is like a soft, non-splashing flow and full shower drops. These aerators allow you to save up to 50% from water gives with a softer flow with its ability to mix water with air.

## %100 BRASS Body

It is produced from high grade brass raw material by technological casting system. The wall thicknesses are designed to meet performance criteria for water passages.

## GUARANTEED FOR MORE THAN 1.000.000 CYCLES Ceramic cartridges

Cartridges are the heart and most important working parts of mixers. Adell products are made of long-lasting and quality cartridges with Spanish Sedal Brand ceramic discs. It has also 35 mm, 40 mm, with legs and without legs. We also use special cartridges in some series. Full tightness, heat resistance, abrasion resistant, but all are long lasting.

## SS304 STAINLESS STEEL Flexible hoses

Basin and kitchen mixer come along with %100 tested leak-proof stainless steel flexible hoses. They are healthy and strong.

Depending on product groups and designs, specifications may vary from spare parts.

# ADELL REFERENCE PROJECTS.

Top of the line craftsmanship design make us one of the most preferred brand for quality housing projects, public and semi-public areas.

TT Arena Stadium, Ido Terminal Facilities, Ulusoy, Medical Park, Gocek Marine, Batman University, Van Toki, Şafak Hospital, Hakkari Airport and more unique projects were satisfied with Adell products. Adell products provide benefit to architects, buyers, builders, investors and end users.

You can see us everywhere you are. We are pleased to be your solution partner in many commercial structures, residential buildings, schools, sports, hotels, shopping malls, restaurants, business centers, facilities, airports, hammams, industrial facilities with our products and solutions.

You can check out  
<https://www.adell.com/pages/reference-projects>  
for more reference projects.

# ADELL PRODUCTS ARE GUARANTEED FOR 10 YEARS.

Every product bearing Adell's signature is manufactured under superior technology standards and has a guarantee of perfection in material and manufacturing workmanship. Proof of our trust in our products is the 10-year warranty period starting from the delivery date of the product.

All parts of the product are covered by warranty. Adell's most valuable responsibility is the faith in the perfection of our products put in by our dear customers.

# Mixers

To us, mixers are the leading actors of bathrooms and kitchens.

We designed an extensive range of mixers for you, leaving you with the choice.

We transformed dreams, trends, fashion into designs, processed the most fashionable surfaces. We've added our love into a pinch.

Our bathroom and kitchen fittings offer modern and original design, environmentally friendly use, with diverse colors, designs and model options to suit your lifestyle in bathrooms and kitchens.

The bathrooms, kitchens look great with quality Adell mixers.

# Advanced Kitchen Mixers

We are very passionate to combine design and function in the kitchen.

We believe a home kitchen is the place for the most intimate moments and a home kitchen is the center of that house! Innovative, functional Adell kitchen mixers enhance your kitchen. The most fashionable luminaries, new trends, new lines for your kitchen are stylish and ergonomic designs.

## Flexibility Meets Design

Kelvin is a living example of the complementary effect of armature design on the whole of space with its aesthetically designed geometric forms and soft circular finishes. Completely Turkish design and production, the mixer completes the color concept of the kitchen with chrome, beige and black color alternatives.

Kelvin has the flexibility to deliver water to every corner of even double sinks with its spiraled head and 360° swivel spout. At the end of Use, Adell MagnetClick™ magnetic system makes it easy to pull back the hood and pin it down. In addition, Kelvin's superior water experience is under the guarantee of Adell for 10 years.

# Thermostatic Technology Solutions

## You Will be a Bath-Lover With Adell Thermostatic Mixers.

The special cartridge inside the Adell thermostatic mixers controls hot - cold water fluctuations, automatically stopping the flow of hot water in the event of cutting cold water from the plant floor and reducing the risk of scalding. With this feature, the elderly provide a safe environment for children and pets. It offers water saving and energy saving with its advanced technology. It provides faster, more practical and more comfortable transportation of the hot water at the desired value.

It helps the family budget and lowers water and fuel bills. With thermostatic technology, the temperature is under control and at the desired value.

- 1- Cold water inlet
- 2- Hot water inlet
- 3- 90 ° opening and closing system with special ceramic disc.
- 4- Shower diverter
- 5- Bath spout
- 6- Thermostatic cartridge  
thermostatic technology allows to adjust the water temperature to the desired level.
- 7- Safety lock
- 8- Integrated check valve
